The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pennebaker et al.

Pennebaker et al discloses a device comprising: pedals, a drive transmission means, comprising: a gear and a sprocket a motor means col. 2, line 38, a load control a detecting portion and judgment means fig. 3, 4 and 6.

Pennebaker however does not disclose his device as including a pulley and a belt.

The examiner however notes that it is well known and obvious in the art to substitute chains and sprockets for pulley's and belts.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Note the title and content of the device of Tsai, Loffler et al Nozaki and Ries-Mueller et al.

Art Unit: 3764

Note the overall device of Crasset.
